

Workshop „Developing Key Skills through Design Thinking“

Thursday, May 25th in Weiden

What did you learn interesting during our workshop?

- create an idea in a short time
- get new perspectives by changing teams
- It is surprising how much can be created in such a short time and with great time pressure
- Importance of perspectives
- Powerful ideas in short time
- constructive work progress (step by step like sprints)
- creating something new and useful in this short amount of time was great
- The group change if the users showed how important it is to exchange ideas with others.

What was difficult for you?

- demanding pace
- sometimes language
- the time in the teamwork
- Not thinking topics through to the end
- to finde the rights words in english but at the end it was funny :D
- creating, discussing and presenting in a short time period, but was fun though
- to get the tasks done on time
- Change the thinking and invent new ideas

What else would you like to practice?

- Create personas
- More time -> more methods etc.
- schemes and methods
- No idea, but the workshop was very well structured and the input e.g. with the Jamboard was very helpful. Thank you!
- More ideas... ?

Be creative! Strengthen your teamwork and problem solving!
