

International Summer School on Sustainability

Come and join our International Summer School on Sustainability (ISSS)

50:50	Equal focus on theory and practice	
30	International students	
02	Real life challenges	
6+	Professors and experts on sustainability	

- Students will work on real-life projects, and profit from virtual and in situ input sessions. They will learn to cooperate in teams, and create goal-driven solutions.
- We will encourage 'thinking outside the box', and looking for realistic, application-oriented results.
- 30 international students, 2 companies, 3 professors and several experts on sustainability and key skills for project management and teamwork and a multitude of advisors and helpers come together to learn, experience, share, and implement sustainability concepts.

Your ISSS benefits

01 in-depth theoretical and practical knowledge about sustainability

02 real-life project work

03 social skills with a focus on multicultural teamwork, creativity and presentation skills

04 no fees, even accommodation and meals are included
